Iowa Division of Criminal Investigation
Iowa DCI Criminalistics Laboratory

Dan Voogt, Bureau Chief
Polk County Attorney's Office
Drug and Gang Bureau

Lina Kalin, Director
Iowa Poison Control Center

Lamar Jack, a standout at Woodmont High School in Piedmont, before committing to Anderson University.

Jack was redshirted in the Trojans' 2010-11 season, but the sophomore had been expected to contribute to the university's basketball team this year.

On the basis of an autopsy and the toxicology test results, Shore is ruling Jack's death accidental — caused by "acute drug toxicity with excited delirium that led to multiple organ failure."

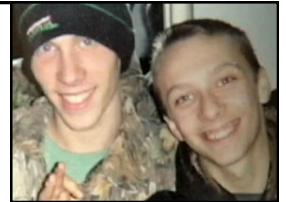

The chemical found in Jack's body is used to make fake pot, a classification of substances that the U.S. Drug Enforcement Administration calls synthetic cannabinoids.

STORIES

Thomas Davis is the father of these two teens... said

"They were my best friends," Darian Lee "Shorty" Davis, 17, Dustin Thomas "Turtle" Davis, 19, who died just before 7:45 p.m. Friday after being hit by an eastbound Amtrak train along East Washington and 11th streets in Mebane, NC. Davis said his two sons walked along those railroad tracks every day without incident as a shortcut. "You can feel a train coming down those tracks," he said. However, Davis said the train's conductor said after he'd blown the whistle, neither young man turned around, and continued walking down the tracks away from the train, until the collision. Thomas Davis stated his sons bought K2, mixed it with marijuana and smoked it to get high that night.
